## MACHAKOS UNIVERSITY

University Examinations 2017/2018
SCHOOL OF PURE AND APPLIED SCIENCES
DEPARTMENT OF MATHEMATICS AND STATISTICS
SECOND YEAR, FIRST SEMESTER EXAMINATIONS FOR

## DIPLOMA IN ELECTRICAL AND ELECTRONICS ENGINEERING DIPLOMA IN BUILDING AND CIVIL ENGINEERING <br> DIPLOMA IN MECHANICAL ENGINEERING <br> SPECIAL EXAMINATION <br> MATHEMATICS $\mathbf{V}$

TIME: 2.00-4.00P.M

Answer Question One and Any Other Two Questions QUESTION ONE (COMPULSORY) (30 MARKS)
a) Define the following terms
i) sample
ii) probability
iii) Mutually exclusive event
b) Given the data

| $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ | $70-80$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 12 | 8 | 20 | 15 | 35 | 20 | 6 | 4 |

Calculate
i) Median
ii) Mode
iii) Mean
iv) Standard deviation
(10 marks)
j) Cards are selected from a deck of cards with replacement what is the probability that
a)The first selected will be a king or Jack
(2 marks)
b)The $1^{\text {st }}$ selected will be a an ace of hearts and the second will be a two of diamonds
k) A variable x is distributed under a binomial form

| X | 0 | 1 | 2 | 3 | 4 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| f | 10 | 4 | 6 | 20 | 14 | 2 | 4 |

Find
I. $E[X]$
(4 marks)
II. $E\left[X^{2}\right]$
(4 marks)
III. $E[X-\mu]^{2}$

## QUESTION TWO (20 MARKS)

a) Find the mean and the standard deviation for the data below
(10 marks)

| Height | $10-14$ | $15-19$ | $20-24$ | $25-29$ | $30-34$ | $35-39$ | $40-44$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | 22 | 40 | 56 | 44 | 18 | 10 |

b) A group of people consists of 20 single and 40 married men with 30 single and 10 married women. Find the probability of selecting a person at random who
I. Is a single man
II. Is a single woman
III. Is a single person
c) The probability of outcomes A, B and C are 0.30 .2 and 0.5 and of outcomes X and Y are 0.6 and 0.4 respectively. Represent the information in a tree diagram given that event A,

B ,C and events $\mathrm{X}, \mathrm{Y}$ are dependent events. Hence find
I. $\quad \mathrm{P}(\mathrm{A}$ and X$)$
II. $\quad \mathrm{P}(\mathrm{B}$ and Y$)$
III. $\quad \mathrm{P}(\mathrm{C}$ and X$)$

The data below was collected from a sample of a certain population and tabulated as follows

| Group | $20-29$ | $30-39$ | $40-49$ | $50-59$ | $60-69$ | $70-79$ | $80-89$ | $90-99$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 1 | 3 | 5 | 15 | 19 | 20 | 8 | 2 |

I. Draw a histogram and find the modal value
II. Draw a cumulative frequency curve and estimate the median
III. Use 64.5 as an assumed mean and find the mean standard deviation

## QUESTION FOUR (20 MARKS)

A P.d.f $f(x)$ is given by

$$
f(x)=\left\{\begin{array}{lr}
k x^{2} & 0 \leq x \geq 1 \\
0, & \text { elsewhere }
\end{array}\right.
$$

Find
i) The value of $k$
ii) $\quad \mathrm{p}\left(x \geq \frac{1}{2}\right)$
(5 marks)
iii) $\quad P\left(\frac{1}{4} \leq x \leq \frac{1}{2}\right)$ (5 marks)
iv) $\quad E(X)$
v) $\operatorname{VAR}(X)$
