

University Examinations 2018/2019

SCHOOL OF PURE AND APPLIED SCIENCES DEPARTMENT OF BIOLOGICAL SCIENCES FOURTH YEAR SECOND SEMESTER EXAMINATION FOR BACHELOR OF SCIENCE IN BIOLOGY SZL 408 APPLIED IMMUNOLOGY

DATE: 10/5/2019 TIME: 2.00-4.00 PM

INSTRUCTIONS

j)

- 1. Answer one (compulsory) and **any other two** questions.
- 2. Use clean well labelled diagrams wherever appropriate.

QUESTION ONE (30 MARKS) (COMPULSORY)

Describe the Coon's insight and its importance in immunological diagnostics b) Describe the process of P-Nucleotide addition during the rearrangements of the (3 marks) immunogenetics c) State three factors that can affect immuno- fluorescence staining technique (3 marks) d) Describe the genetic structure of the antibody (3 marks) Explain the process of N-Nucleotide addition during deletional rearrangement of the e) antibody structure (3 marks) f) Compare and contrast the MHCI and MHCII antigen processing pathways (3 marks) g) Describe the application of HLA polymorphism in vaccine design (3 marks) h) Distinguish between haptens and conjugated antigens (3 marks) State the requirements for the Mixed Lymphocyte immunological reaction in i) transplantation (3 marks)

(3 marks)

Explain the concept and types of immunological tolerance

SECTION B

QUESTION TWO (20 MARKS)

You have a patient suspected to have contracted a viral infection. According to the epidemiology of an area, strain A and B are the most prevalent viruses. Describe any immunological diagnostic procedure to confirm the strain that the patient might have contracted.

QUESTION THREE (20 MARKS)

A patient is suspected to be suffering from a disease that is caused by a parasite Y that induces the expression of antigen X on the surface of the T lymphocytes. Using Flow cytometry technique discuss how you can confirm the infection.

QUESTION FOUR(20 MARKS)

- a) Discuss how foetus evades implantation rejection (10 marks)
- b) Describe a stepwise mechanism of the use of gene therapy to correct a certain immunological disorder (10 marks)

QUESTION FIVE (20 MARKS)

- a) Discuss the concept and method of hybridoma technology (10 marks)
- b) Discuss deletional joining as a mechanism that leads to antigenic diversity and recognition. (10 marks)
