

MACHAKOS UNIVERSITY

University Examinations for 2020/2021

SCHOOL OF ENGINEERING AND TECHNOLOGY

DEPARTMENT OF MECHANICAL AND MANUFACTURING ENGINEERING

FIRST YEAR SECOND SEMESTER EXAMINATION FOR

BACHELOR OF SCIENCE (MECHANICAL ENGINEERING)

EMM 101: ENGINEERING DRAWING & DESIGN II

DATE: 21//6/2021

TIME: 2:00 – 5:00 PM

INSTRUCTIONS

This paper contains **FIVE (5)** questions.

- I) Question **ONE** is **COMPULSORY** and carries 30 marks
- II) Answer any other **TWO (2)** questions.

SECTION A (COMPULSORY) (30 MARKS)

QUESTION ONE (30 MARKS)

Figure: Question 1 shows four parts of a pivotal unit, a pivot base, a pivot bolt, washer, and a lever drawn in first angle orthographic projection. Draw full size in first angle projection the following views:

- a) A sectional front elevation of the Pulley unit assembly on the vertical cutting plane A-A. (12 marks)
- b) A plan view. (8 marks)
- c) Insert a parts list showing all the components. (5 marks)
- d) Insert a suitable title block (3 marks)
- e) Projection Symbol (2 marks)

SECTION B: (ANSWER ANY TWO) [20 MARKS EACH]

QUESTION TWO (20 MARKS)

- a) With the aid of sketches, illustrate the elements of interchangeable system. (9 marks)
- b) Figure: Question 2 (c) shows a pulley assembly. Using the data sheet BS 4500A, calculate the working limits of the different parts in the assembly. (11 marks)

QUESTION THREE (20 MARKS)

- a) Figure: Question 3 (a) shows a scale layout of a piping system. Make a schematic drawing of the piping system in symbol using a suitable scale. Details which are not standard symbols should be made in outline and noted. Missing dimensions may be reasonably assumed. (10 marks)
- b) Figure: Question 3 (b) shows a schematic drawing of a radio kit. Redraw the circuit with the proper symbols for the components missing and include component designation and their values. (10 marks)

QUESTION FOUR (20 MARKS)

- a) Using well labelled sketches, illustrate the following thread fasteners:. (6 marks)
 - i. Sectional view of a cap screw,
 - ii. Machine screw with a nut (round head)
- b) Describe the following thread forms using neat and well labelled sketches:. (4 marks)
 - i. External ISO metric thread
 - ii. ACME thread
- c) Illustrate the hexagonal bolt and nut assembly using the elevation and its side view, given the major diameter (d) as 100 mm. (10 marks)

QUESTION FIVE (20 MARKS)

Figure: Question 5 shows a machine element. Draw in full size, the following views in **FIRST ANGLE** orthographic projection:

- a) The **FULL** section of the front view along C-C. (7 marks)
 - b) End Elevation. (5 marks)
 - c) A plan view projected from the front and end elevation. (5 marks)
- Include 6 major dimensions (radii, diameter, 2 major and 2 minor dimensions) (3 marks)
